# ABOUT US

Launched in 2023, Neumond AI Trading Bots were developed by a team of experts who seamlessly combined cutting-edge AI technology with human insight. Our trading bots consistently deliver daily gains of up to 5.5%.

After over 12 months of rigorous backtesting, we're excited to advance to the next phase of our roadmap by making our platform available to public investors.

# OUR VISION

To establish ourselves as the top platform for cryptocurrency investments by delivering a seamless, user-focused experience that integrates cutting-edge technology, extensive educational resources, and strong security protocols. In crafting our business model, we aimed to strike the ideal balance between empowering users to maximize cryptocurrency earnings through innovative financial solutions and safeguarding our company's financial health to fulfill long-term sustainability commitments.

01

**Our trading bots are powered by a proprietary algorithm, protected under our intellectual property, NEUMOND.**

02

**At NEUMOND, the security of our information systems is a top priority.**

03

**A simple and intuitive interface, making it easy for anyone to become a NEUMOND user.**

# OUR MISSION

At NEUMOND, our mission is to make sophisticated investment opportunities in the cryptocurrency market accessible to everyone, empowering users to grow their wealth securely and sustainably. We are committed to leveling the playing field and ensuring that everyone has the chance to participate in the digital economy and achieve financial independence.

**01**

**To build global trust through stable, long-term operations.**

**02**

**Successfully integrate investment activities across various virtual asset sectors.**

**03**

**Continuously enhance NEUMOND trading bots to broaden our investment services.**

# DIVIDEND ALLOCATION

While our trading bots consistently deliver daily gains of up to 5.5%, we intentionally cap the maximum return rate of our investment plans at 3%. NEUMOND retains any excess earnings to maintain the platform's stability. From these retained earnings, 25% is allocated as a safety buffer to protect invested capital, and 20% is reinvested into ongoing marketing efforts to expand our global reach.

# RISK MANAGEMENT

To reduce risk, NEUMOND utilizes diversification strategies across a broad spectrum of assets and investment products. This approach helps minimize potential losses while enhancing the consistency of returns. Our diversification strategies include:

- Multiple Crypto Assets
- Diverse Investment Products
- Strategic Allocation
- Data Protection
- Regulatory Updates
